ABOUT

I am N. Uma Maheswari Devi, currently pursuing final year BTech in computer science and engineering with a cgpa of 9.1, apart from academics I did an internship on web development, a virtual experience programme with Accenture on Developer and Technology where I completed practical tasks on SDLC, software development methodologies waterfall and agile, algorithmic thinking. Completed certification courses on Data Science and Cyber Security. Proficient in C, Python and SQL. I am good in problem solving.

REASON FOR JOINING PROGRAM

I want to be prepared for the software industry. I want to implement my skills through your mentorship and build a project.

INTERESTED IN

I am keen to learn new technologies and do real-time projects. I would like your mentorship for working on python, data science and I would like to use my problem-solving skills to solve the real-world problems. I look forward to the guidance and insights provided throughout the journey.
